

Vibrant Companions' Digestive Greens for dogs and cats wins NCW 2016 Eco-Excellence Award™

Natural Child World magazine recognizes Vibrant Companions' Digestive Greens as a winner of their Eco-Excellence "Best Pet Products: Supplements" award.

Canaan, CT – August 11th, 2016 Vibrant Companions, a premium line of pet supplements from Vibrant Health, wins *Natural Child World (NCW)* magazine's Eco-Excellence award in the "Best Pet Products: Supplements" category.

The Eco-Excellence award is presented by *Natural Child World* magazine. It is regarded as one of the biggest media awards and the only one to recognize excellence in the world of sustainability and social responsibility. *Natural Child World* Magazine is lifestyle publication that addresses the needs of the modern family with a clear focus on ecologically and socially responsible consumer values. It's a great resource for parents who want to make better choices for themselves and the people they love the most, without sacrificing the things they like the most.

From the Vibrant Companions website: "Digestive Greens is a health supplement formulated to provide high fiber greens and grasses to support digestion and provide antioxidants. Dogs and cats naturally graze on grass or munch on houseplants (many of which are poisonous!). This instinct, in the wild, would be a means to get chlorophyll into their diet, which is incredibly beneficial for their health. However, these days many of our pets don't get access to fresh grass and with the common use of pesticides, it's not ideal for eating. Additionally, lawn grass does not have the same health value and can get caught in the back of a dog or cat's throat, causing gagging."

Vibrant Companions values sustainability and social responsibility and their efforts in these regards are growing. All of their bottles are BPA free, recyclable, and they use sustainable, biodegradable packing materials for shipping.

About Vibrant Companions

Vibrant Companions is the pet line of Vibrant Health, a family-owned and operated company since 1992. Their products support many facets of health, such as immune support, urinary tract health, and digestion. Their mission is to assist through supplemental nutrition the healing of illness and the establishment of optimal health. Vibrant Companions products feature grain-free products made in the United States. When applicable, the products will be flavored using ingredients such as powdered beef liver to appeal to the taste buds of pets. No artificial colors, flavors, or preservatives will be added to their products ever. Just as with anything that comes from Vibrant Health, quality and respect for the end consumer is at the heart of their products.
